

SOC-WIN11 COMMUNICATIONS POLICY

1. Purpose

This document sets out the company policy and standards for protecting employees, company systems, and company data.

2. Scope

This policy applies to all desk-based and field-based employees and other authorised users of company systems and devices.

3. Responsibilities

- Users are responsible for complying with this policy.
- The Incident Response Team (IRT) is responsible for all data-related issues.
- The Security Operations Team (SOC) is responsible for all technical and security-related issues.

4. Exceptions

No exceptions are permitted unless they are formally approved and documented.

5. Detail

Acceptable Use Policy

- Company devices must be used primarily for authorised business purposes.
- All device traffic may be monitored and logged for security, compliance, and misuse detection.
- Company tools, including drills, testing equipment, and vehicles, must be used only for authorised business purposes.

Password and Authentication

- Users are responsible for protecting their passwords and accounts.
- Passwords must not be written down.
- Passwords must be stored only in the company-approved password manager.
- Third-party password managers are not permitted unless explicitly approved.
- Passwords must be unique and must not be reused.
- Multi-factor authentication is mandatory for all company accounts and devices, where available.

Incident Reporting

- All life-threatening emergencies must be reported through the emergency response process.
- Non-life-threatening incidents must be reported to the user's supervisor and manager.
- Data-related incidents must be reported to the Incident Response Team.
- Technical issues affecting work devices must be reported to the SOC Team or via the approved help application.

Data Classification

- Public data may be shared internally and externally.
- Internal data may be shared only with authorised personnel.
- Confidential data may be accessed only by authorised personnel with a business need.
- Restricted data may be accessed only by explicitly authorised personnel with a business need.

Remote Working

- The company VPN must be used when working remotely.
- Public Wi-Fi must not be used for work-related purposes unless approved security controls are in place.
